The revised plans should be further revised to eliminate the pedestrian entrance ramp (which we have been informed *has* been eliminated); improve the appearance of the front doors and door surround; provide the section detail for the cornice; and adjust the fenestration of the two-story façade to correspond better to the piers (or, alternatively, to eliminate the piers).

We also strongly support the NCPC staff recommendation that the parking spaces be removed from the front yard, as it would allow the green space and sidewalk of B Street to continue in front of this new, sizeable building, compensating for the alteration of the setting (including the close proximity of the garage) of Building 18.
